

ISRA Meeting via Skype, 28th Feb 2016

ISRA Officials present at the meeting

Anders Brommesson	ISRA Chairman
Graham Woodward	ISRA Technical Officer
Emilia Sinisaari	ISRA Secretary

ISRA Delegates present at the meeting

Theo Vanginderhuysen	Belgium
Torgny Nordgren	Sweden
Roger Schmitt	USA
Kari Sinisaari	Finland
Ben Woodward	Great Britain
Antonin Vojtik sen	Czech Republic
Kaiar Tammeleht	Estonia
Steen Michaelsen	Denmark
Chris Radisich	New Zealand

Topics to be discussed during the meeting;

- a) Standard wiring of tracks. What will be ISRA's new standard plug?
- b) What is allowed to be changed in the Mossetti chassis?
- c) Distribution of the Mossetti chassis
- d) Other questions

- a) Delegates chose to have a **IEC plug** and a **banana plug** as the standard plugs for ISRA tracks.

IEC plug shall be mounted to the track either vertically or with a protection cover (plastic/rubber...) on top of it (if horizontal).

Track has male type socket and controller female plug.

This rule will be used in 2017 and forward.

This was a unanimous decision, all delegates voted yes. (9/9)

- b) Any replacements to the chassis are illegal. Unanimous decision (9/9)

Stainless steel pin tubes are allowed if Ernie supplies them to all existing chassis there are.

If he doesn't supply them to the existing ones, any chassis with stainless steel tubes are illegal. Unanimous decision (9/9)

Pin can be soldered to the tube.

Brass tube shall be shortened as short as the minimal width of the joint.

- c) Graham will discuss with Ernie about a suitable deadline for worldwide distribution, it shall be some time in end of March.

- d) Indication of slots shall be **clearly visible** on top surface. Graham will ask Janis Nabokins how wide the color stripe is on the 2017 track, then that measurement shall be set as a rule.

Janis Nabokins and Gary Gerding will build the 2016 track. Roger estimates the track parts to be ready some time in April, and the registration could be opened.

Next Skype meeting will be held in April/May.

Lap Master has released a new update and is ready for ISRA. Roger says to prefer using Lap Master in 2016 World.

Production body will be out soon by Attan.
